ABOUT

Undergraduate with interests in Software Engineering, Technology Project Management, and Data Analysis. Experienced with Agile practices, sprint planning, software development, and analytical methods to support data-driven decisions and effective project delivery. Seeking industry experience to further develop technical, analytical, and project execution skills.

EDUCATION

BSc (Hons) Computer Science & Technology (Undergraduate) **2022 - 2026 (Expect)**
Sabaragamuwa University of Sri Lanka, Belihuloya, Sri Lanka.
CGPA : 3.2

G.C.E Advanced Level in Physical Science stream **2020**
ICT – B | Combined Maths - C | Physics – S

PROJECTS

LankaCater – Location and Event-Based Catering Service Finder App

A mobile application that connects users with suitable catering services based on their location and event type. It includes smart filtering options, detailed caterer profiles, and real-time booking features to enhance user convenience.
Technologies: Flutter (Dart), Firebase Authentication, Cloud Firestore, Firebase Storage, Google Maps API, RESTful APIs, Firebase Console, Figma.

Movie Recommendation System – Machine Learning Project

A recommendation system that suggests movies based on user preferences using content-based filtering techniques. It provides personalized recommendations along with relevant movie details to improve user decision-making and experience.
Technologies: Python, Scikit-learn (TF-IDF, Cosine Similarity), Pandas, NumPy, TMDB API, Jupyter Notebook.

Project Management- LankaCater Location-Based Catering Service Finder App (Jira Dashboard)

Managed the end-to-end development workflow of the LankaCater mobile application using Jira. Organized tasks across planning, development, and testing phases, covering authentication, location-based search, booking logic, and image management using an agile Kanban approach
Technologies: Jira, Agile workflow, Kanban.

Real-Time Risk Prediction in IT Projects Using Streaming Machine Learning (Ongoing)

Developing a real-time predictive system that analyzes continuous project data (Jira issues, code commits, sprint metrics) to identify emerging risks in IT projects. Uses streaming machine learning with adaptive models and concept drift detection to generate proactive, interpretable risk alerts for early intervention.
Technologies: Python, River / MOA / CapyMOA (Streaming ML), Matplotlib, Seaborn, Jupyter Notebook

SKILLS & TECHNOLOGIES

Programming Language: Python, Java, PHP, C, C#.
Mobile Development: Flutter, Kotlin.
Web Development: HTML, CSS.
Project Management: Agile & Waterfall, Project Planning, Risk Management,
Data & Analytics: Pandas, NumPy, Power BI, Jupyter Notebok ,Google Colab.
Database: MySQL, Firebase.
Tools & Technologies: Git, GitHub, VS Code, Figma, Trello, Jira, Microsoft Project,
Development Practice: OOP, Agile Methodology, Data Structures & Algorithms (DSA)
Soft Skills: Leadership, Communication, Strategic Planning, Analytical Thinking

CERTIFICATES

Foundations of Project Management -Coursera Online Course
Project Initiation: Starting a Successful Project-Coursera Online Course
An Introduction to JIRA Architecture-Alison Online Course

EXTRA CURRICULAR ACTIVITIES

Society of Technological Studies | SUSL - Secretary

LANGUAGES

English (Fluent)

Sinhala (Native)
